

## JLA 7 Compact Industrial Dryer

Precision made in Switzerland, the JLA 7 industrial dryer is almost the same size as a domestic machine but with a much larger capacity. The dryer is stylishly robust with a stainless steel finish and has auto dry cycles to ensure maximum energy savings. Loads can also be dried to touch by running the machine at 10-minute increments. A large capacity drum ensures fewer creases in laundry and thereby reduces ironing time. The dryer is simple to use with push button operation, has a large door for easy loading and unloading and can be stacked with a matching washer where space is at a premium.

A condenser version of the dryer is ideal for internal rooms and sites such as ward ends and hairdressing salons because it does not require external venting. The fastest condenser dryer available, it is stylish, energy efficient and runs almost silently.
