

## JLA 7 Compact Industrial Washer

Almost the same size as a domestic machine but with a larger capacity, the JLA 7 industrial washer is stylishly robust with a stainless steel finish and is extremely energy efficient. Precision made in Switzerland and remarkably quiet, the machine features an 'eco button' which dramatically reduces water consumption and cycle times. A 1,400rpm spin speed makes further savings by extracting more water from laundry and thereby reducing drying times. The washer is fitted with a built-in Type 'A' air gap to fully comply with relevant water regulations. It is available as a standard pump drain model or a medical sluice washer complying with health guidelines. Simple to use with push button operation, the washer has a large door for easy loading and unloading and can be stacked with a matching dryer.
