# JLA Compact Industrial Washer

## 110, 220lb capacity, high speed spin

This range of washer extractor has been specifically designed using the latest computer aided design technology in combination with years of real life laundry experience. The range has variable extraction speeds to accommodate the different extract speed requirements for today's modern textiles. The robust design of the range is complemented by the latest microprocessor technology providing total programming flexibility to meet the demands of your laundry. The 50Kg machine has steam or electric water heating making it suitable for any location.

### Features

Microprocessor controlled  
 Heavy duty design  
 Frequency inverter drive  
 Easy installation  
 Quiet operation  
 Extraction  
 OTEX disinfection

### Benefits

Easy to use, user friendly touch screen LCD computer control  
 Designed with simplicity in mind and yet built to heavy duty standards, perfect for today's high production and cost conscious laundry operation  
 This enables wash and extract speeds to be programmed through the computer, giving complete control of the wash and extract cycles as well as resulting in energy savings  
 No special foundation prior to installation  
 The outer drum is suspended on four pneumatic air springs for a smooth, quiet operation  
 Vibration is virtually eliminated during extraction  
 Variable extraction up to 800 rpm, G Force 362  
 Optional integral OTEX Validated Ozone Disinfection System
