JLA Industrial Dryer

200lb capacity with one or two way tilt options

JLA D200

THE PROFESSIONALS CHOICE

SPECIFICATION

Details	Units	D200
Height non-tilt gas	mm	2743
Height non-tilt steam	mm	2934 (3239 when steam is operating)
Height tilt option gas	mm	2762 (2978 when tilted)
Height tilt option steam	mm	2956 (3173 when tilted) (3261 when steam is operating)
Width non-tilt	mm	1917
Width tilt option	mm	1943
Depth non-tilt	mm	1436
Depth tilt option	mm	1670 (2217 gas, 2172 steam when tilted)
Net weight gas	Kg	1528
Net weight steam	Kg	1644
Drum volume	m ³ /l	2.11/2110
Sliding door opening width	mm	933
Control	-	Microprocessor Phase 7
Heating	-	Gas/Steam
Electrics gas heated	Volt/ph/amp	415/3/40
Electrics steam heated	Volt/ph/amp	415/3/60
No. of water connections	cold	1
Size	"BSP	3/4
Gas rating	KW(BTU)/hr	190.5(650,000)
Size	"BSP	1
Steam rating	Kg(lb)/hr	405(890)
Size supply & return	"BSP	2
Compressed air non-tilt	m ³ (ft ³)/hr	0.12(4.25)
Compressed air tilt option	m ³ (ft ³)/hr	0.2(7.0)
Pressure	psi	80
Size	"BSP	1/8
Airflow	m ³ (ft ³)/min	150(5300) gas, 184(6500) steam
Exhaust	Ømm	508
Ventilation/make up air	m ² (in ²)	0.42(650) gas, 0.5(780) steam

SAFE - Sensor Activated Fire Extinguishing system

SAFE is a unique system specially designed to eliminate serious fires which start in tumble dryers. Developed exclusively for JLA, the Sensor Activated Fire Extinguishing system combats blazes which are often caused by spontaneous combustion or small loads that are over-dried.

SAFE is fast and efficient. When a fire starts in a dryer drum, two sensors detect the change in temperature and activate a sophisticated water vapour mechanism.

The vapour douses flames within seconds and the drum rotates, exposing and soaking all laundry to ensure that the fire is completely extinguished. The entire process takes just three minutes and if the fire restarts for any reason, the vapour mechanism reactivates.

A great advantage of SAFE is that the risk of major damage to dryer and property and flooding to premises is eliminated.

JLA Industrial Dryer

200lb capacity with one or two way tilt options

JLA's superb AD200 tumble dryers have been specially designed and constructed to industrial standards whilst at the same time combining efficiency and economy. Large 200lb drum capacity increase throughput. Sliding doors and the tilting option ensures easier loading and unloading of bulky items such as duvets and sheets etc. Microprocessor controlled preset programmes eliminate user error whilst auto-dry cycles prevent energy wastage and cut down on ironing and finishing. Other features include a permanent press cycle and variable temperature settings, which guarantee optimum drying temperatures for all fabrics.

Features

Microprocessor control
 Large lint drawer
 Heavy duty sliding doors
 Teflon coated drum
 Unique roller drive system
 Reversing drum
 Self cleaning blower fan
 Three phase motors
 Insulated cabinets
 Tilting option
 Supplied in two sections

Benefits

Simple easy 1 touch operation with 6 pre-programmed cycles. Tailor-made cycles can also be stored.
 Clean lint filter prompt for maximum efficiency. Self diagnostic error codes for easy fault finding. Auto dry cycles prevent energy wastage and cut down on ironing and finishing.
 More efficient drying, easy to clean.
 Massive 933mm sliding door opening for easy loading and unloading.
 For durability and longer life incorporating removable perforated basket panels for easy cleaning.
 Supports and drives the drum, and ensures longer life.
 Reversing drum eliminates the possibility of 'tangling' of larger items such as sheets etc.
 A jet of compressed air ensures that the blower fan is kept clean of lint eliminating and undue vibration or loss of efficiency through lint build up.
 For durability and longer life.
 Both gas and steam models incorporate energy saving insulated cabinets.
 For enhanced ease of loading and unloading.
 For easier installation, easier to manoeuvre.
