JLA S/AAR Finishing Table

Designed for fast and efficient ironing, the JLA S/AAR finishing table is simple to operate and ensures professional results with the minimum of staff training. Constructed to the highest standards with a stove-enamelled cabinet, this table comes complete with a commercial steam iron with micro-switch steam control and a heated ironing board. A built in vacuum cools garments for sharper creases and holds them to the table for better finishing. A steam generator is also built in to provide continuous steam operation.

Features

High build quality
Heated ironing board
Built in vacuum
Easy to operate
Commercial steam iron
Built in boiler & powerful steam jet

Benefits

Stove enamelled cabinet - cleanliness and long life with robust reliable performance
Removes residual moisture, keeps ironing surface dry
Cools garments for sharper creases and holds garments to table for better finishing
Professional finishing results with the minimum of staff training
Constant supply of steam for professional quality finish with micro-switch steam control
Excellent results in a short space of time

JLA S/AR Finishing Table and S/MG1

The S/AR professional ironing table has been designed for the fast ironing of personal garments in small to medium commercial applications, producing high quality results with the minimum of time and effort. The built-in vacuum holds garments to the table and removes excess moisture, producing sharper creases and a superior ironing finish. Easy operation and minimal training ensures that the ironing time is halved compared to household irons and ironing tables. Mounted on castors the unit can be easily moved where space is at a premium. Simple installation, 13 amp single phase electric supply.

Features

High build quality
Heated ironing board
Built in vacuum
Easy to operate
Commercial steam iron
Mounted on castors
Simple plug in to 13amp socket

Benefits

Stove enamelled cabinet - cleanliness and long life with robust reliable performance
Removes residual moisture, keeps ironing surface dry
Cools garments for sharper creases and holds garments to table for better finishing
Professional finishing results with the minimum of staff training
Constant supply of steam for professional quality finish with micro-switch steam control
Unit easily moved for maximum flexibility
No installation costs
